Aroostook County: Top three countries by reported acres

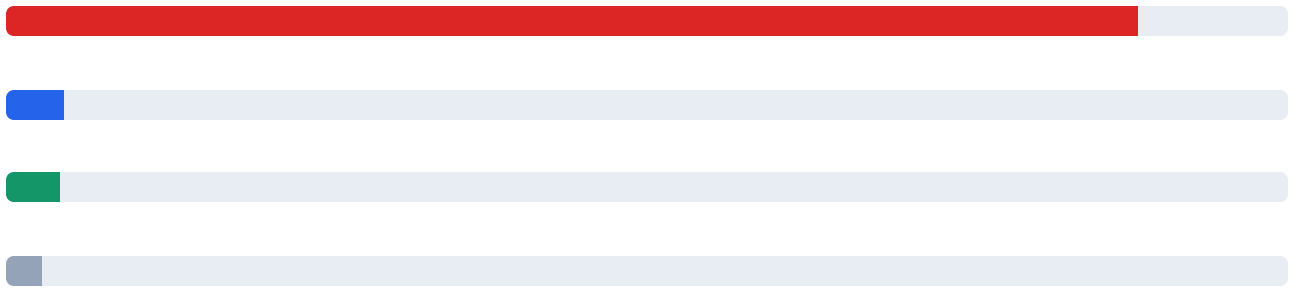

USDA AFIDA FY2024 public records for Aroostook County, Maine.

Ranked by reported acres, not by dollar value. Country names are display labels for AFIDA country/source codes.

COUNTY REPORTED ACRES	TOP-THREE ACRES	TOP-THREE COUNTY SHARE	DISTINCT OWNER IDS	AFIDA RECORDS
2,085,917.39	**2,026,383**	**97.1%**	**24**	**265**
Total in this AFIDA snapshot	Combined acreage	Share of county total	Names are display labels	Source filing records

County acreage comparison

TOTAL IN THIS AFIDA SNAPSHOT = 100%

1. Canada AFIDA country/source code 124	**1,839,920 ac** 88.2%
2. Netherlands AFIDA country/source code 528	**97,063 ac** 4.7%
3. Portugal AFIDA country/source code 620	**89,401 ac** 4.3%
All other countries 2 additional country/source codes	**59,534 ac** 2.9%

Why this matters locally

See how reported foreign land interests are concentrated locally, and where land use and filing history may deserve a closer look.

What the shares mean

Shares refer to AFIDA-reported acres, not all county land. The records include different kinds of land interests.

What this report covers

County overview and country comparisons are followed by Canada-linked holder, acquisition-year and value detail, then source notes. Longer tables continue onto additional pages.

What the records cannot establish

These records alone do not establish motive, government control, migration patterns or wrongdoing.

Reading the figures

Rounded shares may not add to exactly 100%. This is a snapshot of submitted USDA filings, not an independently complete census of land or owners.

Aroostook County, Maine

Source-accurate Citizen Report using USDA AFIDA FY2024 holdings records

Dataset fingerprint: SHA-256 592664aaa9bb5328...
Aggregated from 265 source filing records.

Reading the value fields

Reported $0 means the source field contains zero; blank means no value is supplied. **Current Value** is the source value-at-filing field, not a new appraisal or today's market value.

Top-three country detail

Reported acreage, Owner Ids, parcels, Type of Interest, and independent value fields.

Each value total is read from its corresponding source column. Positive, reported-zero, and blank counts remain separate.

2018	2	3	49,743.00	3	0	0
2019	4	11	89,544.20	10	0	1
2020	1	1	23,024.62	1	0	0
2021	1	1	6,168.00	1	0	0

Reported-zero convention

Reported $0: The FY2024 AFIDA source dataset used for this report records zero in the Purchase Price field.

Ledger boundary

Rows aggregate Report Year + Owner Id + Acquisition Year and count distinct Parcel Ids. Acres are summed from Number of Acres. Highlighted rows identify higher parcel counts only.

Reported values and review notes

Source values remain independent and traceable to source filing records.

Detail country: Canada

POSITIVE	REPORTED $0	BLANK

Coverage 250 of 250 - nonzero median $371,000 - range $1,000 to $21,746,003

How the figures were counted

- Report rows use Report Year + Owner Id + Parcel Id as the deterministic key.
- Owner rollups use Owner Id, not owner-name text.
- Acquisition events group by Report Year + Owner Id + Acquisition Year.
- Parcel counts use distinct Parcel Ids.
- Country totals reconcile to the underlying county rows.

How to read the value fields

- Purchase Price, Estimated Value, and Current Value are read directly from their source columns.
- The three value fields are not calculated from one another.
- Positive, reported-zero, and blank values remain separate.
- Totals and medians describe reported source coverage only.
- No independent appraisal or appreciation claim is made.

Source conventions and traceability

Definitions used consistently throughout this Citizen Report.

County: Aroostook County, Maine
Report year: FY2024

Reported acreage

Reported acreage is the sum of Number of Acres from the deterministic county report rows.

Country/source code

Country names are display labels for AFIDA country/source codes. These are described as source codes rather than standard ISO codes.

Owner identity rule

Owner rollups use Owner Id, not owner-name text. The identifier is scoped to this report year; similar names remain separate and do not establish beneficial ownership or continuity across years.

Independent value fields

Purchase Price, Estimated Value and Current Value are independent source fields. Current Value is a value-at-filing field, not a fresh market appraisal.

Reported-zero convention

Reported $0: The FY2024 AFIDA source dataset used for this report records zero in the Purchase Price field.

Interpretive boundary

Filings alone do not establish government control, wrongdoing, displacement or migration; those questions require separate evidence. For holder tracing, county comparisons or source checks, discuss a scope with FIRMS. Custom research is separate from this county report.

Timeline reading convention

The year is printed above each marker and the parcel count is printed below it. The source field is Acquisition Year and is not relabeled as Purchase Year. The printed ledger supplies the corresponding Owner Id counts, acres, and Purchase Price field counts.
